Smart Technology

ENERGY

Harvest the free energy from our plentiful air to

heat your water with the advanced Midea heat pump from Chromagen. This renewable energy

water heating technology uses up to 65% less

energy¹ than a conventional water heater, whilst

providing reliable hot water all day and night.

Did you know?

only convert 1 kW of input power into a maximum of 1 kW of output heat.

Features

Modern & Stylish A stylish slim line single piece unit incorporates a top-mounted compressor with compact footprint

Handy Controller

Providing intuitive

operation & helpful

functions such as temp

setting, timer & safety lock

Highly Efficient roduces significantly more heat energy than the power input; saving on purchased energy

Built in Frost

Protecting the condenser

from icing for complete

contamination

Auto Disinfection Periodically heating the water beyond its set temp to prevent the growth of

An energy efficient hot water system such

as the Midea heat pump is a great way for

households to make substantial reductions

in their energy consumption and cost of

A heat pump provides a quick and easy

replacement of your old energy-hungry

 CO_2 emissions by over 4 tonnes, and

saving you up to \$930* per year.

bacteria and legionella

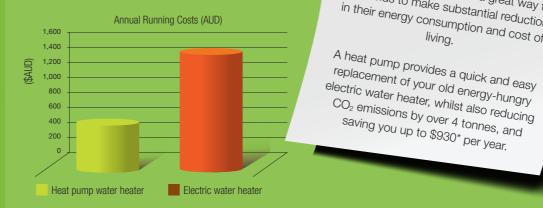

Conserving energy while the heat pump is idle, and automatically reactivates prior to your return

Energy Efficiency

Did you know?

Water heating accounts for nearly a quarter of the energy use and greenhouse gas emissions in the average Australian home.

袾

*Estimation based on HP280 (RSJ-35/300RDN3) STC's in Zone 3 under medium load, obtained from independent laboratory test results and followed by TRNSYS modelling and a retail electricity cost of \$0.30c per kWh.

How it Works

- 1. A fan draws in air, containing heat energy, across the evaporator
- 2. The evaporator turns the liquid refrigerant into a gas
- refrigerant into a hot gas
- 4. The hot gas inside the condenser coil heats the water inside the coil-wrapped tank
- 5. The refrigerant reverts back to a process to start again

¹ Energy use reduction based on CER (AS/NZS 4234) modelling, in Zone 3.² Average COP is 3.72 based on AS/NZS 5125 test condition 2. Applicable to HP170 model only. Applicable to HP280 model only. Images indicative only - Actual product configuration may differ

HP280

Smart Technology

With a Midea heat pump, set up and operation monitoring is made simple thanks to an amazing, in built user-friendly controller.

Operational modes

ECO (Heat Pump Only) mode: The standard mode where the highest efficiency is achieved

Hybrid Mode: The Heat Pump & E-heater operate together to ensure the set temperature is achieved

E-Heater: When the air temperature drops to below 5°C, the heat pump will automatically select E-heater mode for an electric hot water boost

IP280

Low Operating Noise Operating at a very low 48 dBA you will hardly know it's there!

Power Outage Memory Settings are retained in the event of a power

outage

3. The compressor pressurises the

liquid after heating the water and continues to the evaporator for the

Product Specifications

Heat Pump Model	HP170	HP280
Nominal volume capacity (L)	170	280
Voltage / Hz / Phase	220-240 / 50 / 1	220-240 / 50 / 1
Element input power (W)	2150	3000
Heating capacity - Heat Pump Only (W)	1500	3000
Max water temperature (°C)	65	60
Max rated input power (W) / current (A)	2780 / 12.1	4300 / 18.7
Relief valve pressure (kPa)	1000	1000
Noise level (dBA)	48	48
Net Weight (kg)	90	145
Pipe connection diameter (mm)	DN20	DN20
Cylinder Type	Vitreous Enamel	Vitreous Enamel
Outdoor resistance class	IP24	IP24
Operating Mode Function	Manual	Automatic
Refrigerant type/quantity	R134a / 0.8kg	R134a / 1.2kg

Australian Standard AS/NZS 2712

Why choose Chromagen?

- ${\rm o}~$ A leading provider of solar energy solutions with over 50 years history
- Offices Australia wide with a national dealer & service network

Residential Warranty

920

3 Year Compressor (1 Year Labour)

Eligible for Government Incentives

280L Installed Unit

The highly energy efficient Midea hot water heat pumps qualifies to generate Small-scale Technology Certificates (STCs) under the Federal Government RET scheme and so Australian consumers can use these to reduce the point of sale price of their heat pump.

- A wide range of energy efficient solutions to suit your lifestyle
- o Committed to quality, innovation & energy-efficient solutions
